## What can I expect to do for work if I become a HET - Heavy Duty Equipment Mechanic (Off Road)?

HET - heavy duty equipment mechanics (off road) maintain, repair and overhaul heavy vehicles and industrial heavy equipment. This may include:

- internal combustion engines and components, both stationary and mobile,
- tracked equipment, commonly called crawler tractors,
- ground engaging equipment and components,
- earth moving equipment,
- off-highway motor vehicles, commonly called trucks,
- towed off-highway vehicles, commonly called trailers,
- interpreting work orders and technical manuals,
- keeping equipment cleaned, lubricated and maintained,
- diagnosing faults or malfunctions,
- adjusting equipment and repair or replace defective parts, components or systems,
- testing repaired equipment for proper performance and ensure that the work done meets manufacturers' specifications and legislated regulations, and
- completing service reports.

## What kind of working conditions can I expect?

The working environment for HET - heavy duty equipment mechanics (off road) varies considerably from one job to another. Some HETs work in modern laboratories. Others work at construction or industrial sites, sometimes outdoors in all types of weather conditions. Travel requirements and hours of work also vary. There is risk of injury involved in working with heavy equipment and power tools. Proper safety standards are maintained at all times.
