A. PROGRAM RATIONALE AND PHILOSOPHY

The fine arts embrace music, art and drama without obscuring their uniqueness. Each has a body of content, partly derived from tradition and partly developed from the insights and interests of those involved. Each has its own mode of expression and makes its own contribution to society, necessitating the inclusion of the arts as separate subject areas in the school program.

There are fundamental principles which apply to all three. Specifically, the student is involved as a creator, a performer, a historian, a critic and a consumer. Throughout the grades an articulated fine arts program should enhance the depth and breadth of expression and intuitive response. The maturing student learns to appreciate, to understand, to create and to criticize with discrimination the products of the mind, the voice, the hand and the body.

PHILOSOPHY FOR MUSIC EDUCATION

The systematic development of musical skills, knowledge and perception contributes to the total development of the individual. Music is accessible to all, and as students become sensitive to its expressive elements, they may develop insight into human feelings. Music education should begin at an early age and continue to encourage creative expression through performance, listening and composition.

The sense of meaning in music can be developed by the student as:

**Performer**

Performance is an active process involving the development and application of musical skills, knowledge and perceptions.

**Listener, Evaluator, Consumer, Historian**

These experiences develop an understanding of music and musicians of the past and present.

**Composer**

The organization of the elements of music into an intrinsically satisfying composition generates aesthetic creativity and perception.
B. GENERAL LEARNER EXPECTATIONS

The Senior High School Instrumental Music Program is designed to help students to develop competencies and to strive for excellence in the following categories:

PERFORMING

- To discover, develop and evaluate their talents and abilities in musical performance through establishing, extending and reinforcing correct technical skills.

- To recognize, interpret and perform rhythm, melody, harmony, form and expression as they appear in musical notation.

- To develop and perform a repertoire of quality literature.

LISTENING

To develop the ability to make intellectual and aesthetic judgments based on critical listening and analysis.

CREATING

To develop additional avenues of self-expression through interpretation, improvisation, arranging and composing.

RESEARCHING

To develop a knowledge of music history and literature and its relationship to world history. To make students aware of the applications of music in our society with respect to music careers, and avocational and leisure uses.

VALUING

To grow in the appreciation, understanding and enjoyment of music as a source of personal fulfillment.

ATTITUDES

Positive attitudes are fostered by success in singing, playing, reading, listening, creating and valuing music. Through instrumental music, students will be encouraged to:

- value the uniqueness of this communication skill
- appreciate fine arts as a form of personal enrichment, self-expression and/or entertainment
- be appreciative of human values as they are recorded in great instrumental literature
- develop positive, realistic self-images through an understanding and acceptance of themselves, with their strengths and their limitations
- develop an appreciation of the social value of instrumental participation
- continue to develop their creative abilities and to use them in a constructive manner to contribute to society and to personal satisfaction
- apply maximum effort and attain effectiveness in performance through physical and mental discipline
- appreciate creativity as exhibited in all areas of human endeavour
- maintain positive attitudes toward leisure in all its forms, present and future
- value the necessity of learning throughout life
- develop a sense of purpose in life and joy in living.

OVERVIEW OF THE PROGRAM

The Senior High School Instrumental Music Program is designed as a sequential and developmental approach to music instruction. Each level grows from those experiences previously presented. The program should be flexible, providing for several levels of student ability and achievement.
The Senior High School Instrumental Music Program may consist of a wind/percussion program and/or strings program. The basic theory aspects presented here apply to both string and wind/percussion programs. However, this document only deals specifically in its application to the wind/percussion program. The complete strings program (Levels I–VI) is contained in the Junior High School Instrumental Curriculum Guide, 1988 (pp. 67–107).

The goals of the wind/percussion program are achieved through the development of aural skills, technical/theoretical skills, interpretive skills, intellectual skills and synthesis skills. In the secondary music program these skills are divided into six levels: Levels I, II and III (junior high, Grades 7–9); Levels IV, V and VI (Music 10–20–30).

Thus Levels IV, V and VI correspond to the first, second and third years of the high school music program; typically Grades 10, 11 and 12. Entry into the Level IV program presumes the student has successfully completed Level III of the Alberta junior high school curriculum or its equivalent. It is expected that by the end of three years in the senior high school music program, Level VI will be achieved.

Since the six levels of music comprise a continuous developmental pattern for growth and achievement and not necessarily a time period elapsed, additional entry into the high school music program can occur with teacher/administrator discretion even though a student may not have taken specific levels previously in a classroom setting.

★ Students may also be admitted to Instrumental Music 10 at teacher/administrator discretion.

Implementation Note:

Historically, the combining of students from more than one level into a single class has often been necessary. Undoubtedly this practice will continue; however, it is recommended that classes of only one level be offered where numbers warrant.

When two or more levels are combined, the teacher may adapt this curriculum in the areas of written and aural skills, rhythm and articulation, and history and listening, by selecting elements from each level taught. All other required components remain as specified.

**Level VI**

Tympani Technique

Other Percussion Instruments

The student will continue to develop proper techniques in playing other common percussion instruments as in the following:
1. Bass drum stroke, muffling and 1- and 2-handed rolls.
2. Cymbal crashing and choking techniques.
3. Triangle stroke and roll techniques.
4. Tambourine stroke and roll techniques.

The student will become familiar with and be able to perform on the following additional percussion instruments and accessories: woodblocks, cowbells, guiro, castanets, maracas, shaker, gong, finger cymbals, afuche, vibraslap and slapstick (whip).

**Literature**

Since there is often great disparity in the level of difficulty between the percussion parts and the rest of the band, it is suggested that percussionists be strongly encouraged to perform standard solo and ensemble literature.
Rhythm

Level IV

Note: When two or more levels are combined in one class, the teacher may adapt “rhythm” by selecting elements from each level taught.

The student will be able to recognize, write, verbally count and perform at various tempos:

  \[ \begin{array}{c}
  \text{\(\frac{3}{4}\)} \\
  \text{\(\frac{3}{8}\)} \\

*The student will:*

- recognize tone/semitone relationship in a series of pitches
- understand how $\flat$, $\natural$, and $\sharp$ are used as accidentals, affecting fingerings, slide positions and notes
- recognize and perform accurately in the keys of:
  
  CONCERT  $A_b$, $E_b$, $B_b$, and $F$

  - embouchure formation
  - breath support
  - aural concept of the characteristic tone
  - initiation of the tone
  - release of the tone
- demonstrate acceptable intonation

---

Instrumental Music 10–20–30 (Senior High) /29
(Revised 1991)
Level IV (continued)

General Technique
The student will continue to develop evenness and facility of both hands to perform all forms of hand-to-hand techniques, including single and multiple bounce strokes and sticking patterns which mirror each other; e.g., \textbf{RLLRLRL}.

Snare Drum Technique
1. Continue to work on open and closed roll techniques for evenness and control at all dynamic levels.
2. Continue to develop flams, paradiddles, 3-stroke drags, 4-stroke ruffs, flam accents, flam paradiddles, and 5-, 7-, 9- and 17-stroke rolls.

Tympani Technique
1. Continue to develop ability to perform a smooth roll, passing rolls and dampening technique.
2. Continue to develop tuning abilities, including the ability to tune multiple pitches from a single given pitch (such as that from a pitch pipe, tuning fork or a mallet instrument), without the aid of tuning gauges.

Other Percussion Instruments
The student will continue to develop proper techniques in playing other common percussion instruments as in the following:
1. Bass drum stroke, muffling and 1- and 2-handed rolls.
2. Cymbal crashing and choking techniques.
3. Triangle stroke and roll techniques.
4. Tambourine stroke and roll techniques.

The student will become familiar with and be able to perform on the following additional percussion instruments and accessories: woodblocks, cowbells, guiro, castanets, maracas, shaker, gong, finger cymbals, afuche, vibraphone and slapstick (whip).

Literature
Since there is often great disparity in level of difficulty between the percussion parts and the rest of the band, it is suggested that percussionists be strongly encouraged to perform standard solo and ensemble literature.

- articulation

Note: Where two or more levels are combined in one class, the teacher may adapt “articulation” by selecting elements from each level taught.

The student will:

- recognize and perform articulation patterns of:

These articulation patterns are models to be used in any melodic pattern.

REQUIRED/ELECTIVE COMPONENT

The required component encompasses the knowledge, skills and attitudes that all students in the program should be expected to acquire.

The elective component provides opportunities to adapt and enhance the required portion of the program to meet the diverse needs and capabilities of individual students. It encourages the adaptation of content, teaching strategies, instructional time, evaluation activities and learning resources to meet specific individual student and/or group needs. The elective component provides for enrichment and for additional assistance to individual students, as necessary. Elective time may be used to develop further the required learner expectations through other forms and components, or add other learner expectations where appropriate. The maximum time allotment for the elective component of each complementary course is designed to be 30% of the instructional time.

The following list of strategies may be employed in order to address the elective component of the curriculum. These strategies are recognized as an integral part of a successful music program.
