

I am **responsible** for leading
NWT Education Renewal.

Honourable Alfred Moses
MINISTER OF EDUCATION, CULTURE AND EMPLOYMENT

I am more than ABCs.

As Minister, I believe our education system must provide students with every opportunity to productively explore their gifts and the things that energize them. It must offer them the right supports for the best start in life and choices for their future. It should also ensure teachers are equipped to guide students through the learning experience. They must be supported with good working conditions and professional development opportunities. I am proud to lead these improvements to our education system because I believe it will create a better future for us all.

NWT Education Renewal is about providing all students with the best education to seize opportunities for success in the path they choose.
