

Skills 4 Success

Skills 4 Success is about making system wide improvements to the adult and postsecondary education and skills training programs, supports and pathways. It is aimed at improving employment success for NWT residents, closing skill gaps for in-demand jobs, and effectively responding to employer, industry and community needs.

Our Goals

Skills 4 Success is an evidence-based initiative with the vision that: *“NWT residents have the skills, knowledge and attitudes for employment success”*.

We want northern residents to be first in line for jobs in the NWT. We also want to help build and expand a skilled workforce to meet the NWT’s future labour demand. To do this, we must ensure that our education and training system keeps pace with the changing dynamics of our labour market so that NWT residents gain the necessary education and skills required to participate in that job market.

In partnership with The Conference Board of Canada, Skills 4 Success has developed new labour market information for the Northwest Territories that identifies what the job opportunities will be for the next 15 years. This data will prepare NWT residents for the many employment opportunities that exist today and will be needed in the future.

Skills 4 Success has four foundational goals, which include:

- 1) Increase skill levels through relevant education and training;
- 2) Bridge education and employment gaps through targeted supports;
- 3) Grow the NWT workforce through partnerships; and
- 4) Improve decision making with relevant labour market information.
